

DC-2200 Drying cabinet

DC-2200 Drying cabinet is designed especially for drying surgical instruments, anaesthetic hoses & equipment, as well as other reusable items used in patient health care.

It is dimensioned particularly for use together with the Deko-2000 -series washer-disinfectors. The chamber can accommodate two full loads (4+4 shelves) from the washers. The sound and heat insulated double walls of the cabinet are made of AISI304 stainless steel. DC-2200 is available as a single door or pass-through model, left or right-hinged.
